PERSONAL STATEMENT

As a user experience designer, it's my mission to create an intuitive and delightful user experience at every step of the user's journey. By constantly challenging myself in my design work, I keep up-to-date with new skills and technologies in interface design. I enjoy finding creative solutions through technology and design while maintaining superb quality.

WORK EXPERIENCE

Appiness Interactive Pvt Ltd

Jun '21 - Present

UI/UX Designer

Roles & Responsibility:

I am currently handling UI/UX of Mobile and web apps also graphic designs for clients in the organization.

PROJECTS

Quickbytes

A cross-over site between Wikipedia & Instagram. A platform to post and see fun facts, important news, current affairs, info, trivia, and anything as long as it is an interesting piece of info. I have been handling Web and Mobile Design. I create low-fidelity and convert them into high-fidelity mockups and prototypes.

Manipal Ecommerce

Manipal is planning to expand its services & build an eCommerce platform, That will offer Multiple services such as diagnostic & related healthcare tests, sample collection, Medicine delivery at the doorstep, Healthcare packages, Pharmaceutical supplies, etc. I have been working on Web, Tab, and Mobile Design. I create low-fidelity and convert them into high-fidelity mockups and prototypes. Graphic Design for the empty states and graphics for marketing the product on social media, blogs, and marketing collateral.

Commviva [Payplus]

PayPlus empowers merchant partners with a unified payment platform that enables the acceptance of payment instruments across multiple channels. PayPlus is a white-labeled payment acceptance platform for digital merchants and merchant acquirers, which enables merchants to accept payments, across different channels such as online and in-store, and through different payment instruments such as cards and digital wallets.

Vtiger Systems India Pvt. Ltd.

Jun '19 - Jun '21

UI/UX Designer

Roles & Responsibility:

I was working as a UI/UX Designer at Vtiger to design features for the Product and I worked closely with PM to get the feature requirement and translate them to design for both Web and Mobile apps. I have been handling Mobile Design alone and simultaneously working on the web as well with the team. I have worked on revamp of two versions by giving my best in design with the current trend. I create low fidelity and convert them into high fidelity mockups and prototypes. I also work on illustrations / Graphic Design for the empty states and graphics for marketing the product on social media, blogs, and marketing collateral.

Vtiger Systems India Pvt. Ltd.
