Summary

Senior UX Designer with 7+ years of experience designing enterprise SaaS and B2B platforms across complex, data-heavy environments. Strong expertise in product discovery, information architecture, workflow design, accessibility, and design systems. Proven track record of leading end-to-end UX initiatives that improve usability, reduce friction, and align user needs with business strategy. Experienced in Agile product teams, stakeholder collaboration, and scalable product delivery.

Experience

Opentext Pvt Ltd	Bangalore, India
UX Designer	Apr 2024 - Present

Key Responsibilities:

- Led UX strategy and design execution across 7+ enterprise SaaS products within complex B2B ecosystems.
- Owned the end-to-end product design lifecycle from discovery, research, and ideation to wireframing, prototyping, usability testing, and implementation support.
- Standardised user-centred design practices across multiple platforms, improving cross-product consistency and reducing design debt.
- Partnered with Product Managers, Engineering teams, and business stakeholders to translate complex business requirements into scalable solutions and intuitive user experiences.
- Architected unified information architecture and modular workflows for enterprise systems with extensive integrations, including EDI, APIs, and ERP platforms.
- Conducted portfolio-wide UX audits and heuristic evaluations to identify usability gaps and improve workflow efficiency and product adoption.

Key Projects

Document Accessibility

Led a comprehensive UX audit and redesign of the document verification journey, resolving 20+ critical usability issues. Introduced guided checkpoints and structured progress patterns that reduced friction and improved completion rates.

Software License Download Platform

Consolidated three legacy enterprise systems into a unified information architecture. Reduced navigation complexity and improved cross-product discoverability through streamlined task flows.

Process Automation

Led UX strategy and visual redesign for a large-scale product modernisation initiative. Transformed fragmented manual workflows into a cohesive automated platform aligned with enterprise design standards. Designed AI API configuration experiences for the admin portal to simplify complex system management tasks.

Project and Portfolio Management

Led UI redesign and modernisation of an enterprise Project and Portfolio Management platform used for planning, tracking, and governance of complex projects. Improved visual hierarchy, navigation clarity, and dashboard usability to support real-time project insights and resource management. Designed interaction flows and reporting interfaces to streamline portfolio visibility and decision-making.

Trading Grid Supplier Hub

Designed complex dual workflow systems supporting multiple enterprise client models. Addressed negotiation logic and dependency-driven processes while delivering structured end-to-end journeys that improved operational efficiency for both internal and external partners.

Key Responsibilities:

- Led UX design across web and mobile products for healthcare, fintech, and ecommerce clients.
- Delivered high-fidelity product experiences across the full UX lifecycle.
- Collaborated closely with cross-functional Agile teams to ship end-to-end features.
- Reduced redesign cycles through clear interaction specifications and design documentation.

Key Projects

Manipal eCommerce

- Designed complete user flows and high-fidelity interfaces for a large-scale healthcare e-commerce platform.
- Improved the patient purchase journey and checkout experience, increasing task completion efficiency.

Comviva PayPlus

- Defined the multi-channel UX strategy for a global payment gateway, focusing on merchant onboarding and transaction workflows.
- Delivered high-fidelity prototypes that simplified complex payment processes, reducing user friction and improving merchant adoption.

Key Responsibilities:

- Led end-to-end design for web and mobile products, improving usability and workflow efficiency through structured user flows and refined interaction patterns.
- Reduced development rework by delivering clear wireframes, detailed prototypes, and well defined interaction specifications for major product transformations.
- Collaborated closely with Product, Engineering, and Marketing to deliver high-quality, user-centred feature releases aligned with business goals.

Education

Global Academy of Technology	Bachelor of Engineering
Computer Science Engineering	2016 - 2019
Dayananda Sagar Institute of Technology	Diploma
Computer Science Engineering	2011 - 2015

Skills

🛠 Design Tools

Figma, Axure, Sketch, Adobe XD, Adobe Illustrator, Adobe photoshop, Moqups

🔍 UX Methods

User Research, Information Architecture, Heuristic Evaluation, User Flow, Persona, Wireframing, Prototyping

🧠 Core Competencies

Information Architecture, User Research, Usability Testing, Heuristic Evaluation, Workflow Design, Enterprise UX, B2B SaaS, Accessibility Standards WCAG, Design Systems, Cross Functional Collaboration, Prototyping, Data Driven Design
